Informed that they had passed the following preamble and resolutions, to wit:

Whereas, great expense, delay and inconvenience are occasioned by the Inclined Plane, on the Columbia Railroad, and the interruption it causes to business and travel, is highly prejudicial to the interests of the City.

And whereas, the recent survey made by order of the Canal Commissioners, proves the entire practicability of avoiding the plane, by a comparatively small expenditure, and by a route alike convenient to the City and County of Philadelphia: Therefore,

Resolved, That the Presidents of the Select and Common Councils be, and they are hereby authorized and requested to memorialize the General Assembly of the State, in favor of the immediate construction of a Railroad leading to the City by which the Inclined Plane on the Schuylkill may be avoided.

Resolved, That the Committee on City Property be authorized and directed to adopt such means as they may deem proper to urge the early enactment of a law for the purpose above set forth.

Which was read twice and passed.

So Common Council concurred.

(READ IN COMMON COUNCIL DEC. 7, 1848.)

Laid on the table.

At a Stated Meeting of the Board of Joint Watering Committees, held on Tuesday evening, Nov. 28th, 1848, the following resolution was offered and unanimously adopted:

Resolved, That this Board tender to our kind neighbours, the City of Philadelphia, the thanks of the citizens and inhabitants of the Districts of Northern Liberties and Spring Garden, for the valuable supply of water she furnished them upon the first tidings of our late calamity; thereby relieving them at once from the feverish anxiety occasioned not only by the sudden deprivation of so valuable an article at the moment of their greatest need, but also by the dread of fire, which the absence of water so instantly inspired.

Resolved, That a copy of the above Resolution be furnished to the City Councils.

J. H. FISLER, *Register*.

APPENDIX, No. XII.

To the Select and Common Councils:

The Committee on Legacies and Trusts, in compliance with the directions of the 3d section of the Ordinance of the 1st of October, 1835, submit herewith an estimate of the probable amount that will be required for the service of this department for the year 1849.

In the year 1848, seven engine and eleven hose companies were entitled to and received the customary annual appropriation of \$300. It is probable that the same number of companies will be entitled to an appropriation in 1849, which will require

\$5400 00

This amount, with the sum which will be necessary for the purposes of the Board of Engineers, say

200 00

5600 00

Making together five thousand six hundred dollars, will be all that this Committee will probably require in 1849 for the Fire Department.

Carried forward,

5600 00

Amount carried forward,	5600 00
For incidental expenses in carrying out the various trusts under their care, including taxes on the Bondinot lands, for 1848-9,	225 00
	<hr/>
Total Estimates,	5825 00
Less unexpended balance,	288 16
	<hr/>
	\$5536 84

All of which is respectfully submitted.

APPENDIX, No. XIII.

To the Select and Common Councils:

The Committee on Public Highways, in presenting an estimate of the amount required for the public service in that department for the ensuing year, pursuant to the provisions of an ordinance of 1st October, 1835, ask leave to state that all the work enumerated in the item "New paving" for the year 1848, has been completed, with the exception of Rittenhouse Square, Cox street, Schuylkill Second street from Pine northward, Schuylkill Fourth street from High to Mulberry street, and Sycamore street; and that they have new paved, in addition to those enumerated in said item, the following streets, viz.: Ralston street, Schuylkill Second street from High to Filbert street, Latimer street from Schuylkill Sixth to Schuylkill Seventh streets, and repaved Mulberry street from Delaware Front street to Delaware avenue.

The Committee have pursued a plan of repairing the streets with pebble stone in all cases where it was practicable, instead of repaving them. This has been found to result beneficially, and caused a considerable saving of money. The Committee has expended in repairs to Delaware Avenue, from the item "Repairing Streets," the sum of nine hundred dollars, which was not contemplated in that estimate.

The "New Culverts," enumerated in this item of the appropriation of 1848, have been built, with the exception of

Delaware Fourth street from Mulberry to Cherry street, Schuylkill Sixth from Spruce to Locust street, and Spruce street between Delaware Second and Third streets; and, in addition thereto, they have built a culvert in Delaware Sixth street, extending from Walnut to George streets and in George street, and a culvert in Pine street from Delaware Front street to the dock.

The omissions in the several items have been made after mature deliberation, and the new work has invariably had the sanction of Councils.

For the year 1849, the Committee estimate the following, viz:

No. 1. For new paving,	\$10,000 00
2. For repaving,	3,000 00
3. For repairing streets and paving over water pipes,	11,000 00
4. For new culverts,	3,000 00
5. For repairs to culverts, inlets, and cleaning culverts,	1,000 00
6. For repairs and labour on City Railroad,	4,000 00
7. For repairing Delaware Avenue,	3,000 00
(If Councils shall decide that this expense is to be defrayed out of the Girard fund, this item may be omitted.)	
8. For miscellaneous purposes, including gutter stone, flag stone, rent of City Surveyor's office, salary of Assistant to City Surveyor, repairing pumps, private alleys, utensils, &c.	4,000 00
9. Rebuilding culvert in <i>Dock street</i> from Walnut street to Tobacco Warehouse,	\$15,000 00
in <i>Walnut</i> , from Dock to Delaware,	7,500 00
	<hr/>
	\$29,000 00
Deduct balance to credit of committee from appropriation for 1848,	3,849 51
	<hr/>
	\$35,150 49

To the Select and Common Councils :

The Board of Managers of Wills Hospital for the Indigent Lame and Blind, submit to Councils their Fifteenth Annual Report.

The expenses of the past year amounted to three thousand nine hundred and ninety-nine dollars and fifty-four cents, which were paid by orders drawn on the Committee of Legacies and Trusts, for the following purposes, viz :

For house expenses,	\$2,352 86

There have been thirty-two important surgical operations performed during the past year, ten of which were the means of restoring the inestimable blessing of vision, in cases where the sight had been lost by cataract.

Besides those who have received the advantages of the Hospital within its walls, there have been two hundred and forty-nine persons who have applied to the Surgeons as *out-door* patients on the regular prescribing days. Nearly all these have been afflicted with diseases of the eye, and have been furnished with advice and medicine gratuitously.

During the past year, the Steward has received from pay patients and other sources the sum of \$679 72, a larger amount than has ever before been produced in the same period. Thus proving that the advantages of the Institution, and the skill of its medical officers, are increasingly appreci-

ated by a class in the community who are able and willing to pay a moderate price for the benefits received.

Another proof of the celebrity of our Institution as an Eye Infirmary may be found in the fact that a number of medical students, who resort to this city from different parts of the Union, have sought the opportunities for instruction which is afforded by the great variety of cases presented in the wards, under the direction of our surgeons.

The Managers venture to express the opinion that there is no Institution in the city where the same amount of means is productive of more positive physical good; and, in several annual reports, they have called attention to the fact that their sphere of usefulness might be greatly enlarged by donations or bequests from our wealthy citizens. In other hospitals, for the relief of human suffering, provision is made for the accommodation of people of color, who are at present excluded from our wards. This class are peculiarly liable, from privation and other causes, to be afflicted with diseases of the eye, and if the means were furnished for the erection of additional buildings on our spacious lot, this and other advantages might be secured, which would more thoroughly carry out the views of the benevolent founder of this charity.

Since our last annual report, the hand of Death has called away two of our colleagues, William Morrison and Robert Toland, both of whom manifested a warm interest in the Hospital. The former was selected by James Wills as one of his executors, and has been connected in the management of the Institution since its first organization.

In closing this report, the Board embrace the opportunity to express their renewed confidence in the faithful and judicious management of the household department, and their sense of the kind attentions and skilful treatment gratuitously bestowed by our physicians, with a fidelity and promptitude, which, while it has greatly contributed to elevate the character of the Hospital, must have produced its reward in the consciousness of well-doing.

Signed on behalf of the Board,

JNO. RODMAN PAUL, *President.*

DILLWYN PARRISH, *Secretary.*

Phila., Jan. 18, 1849.

Resolved, That the Mayor be authorized and directed on behalf of the Mayor, Aldermen and Citizens of Philadelphia, to release from the lien of a judgment entered in the District Court for the City and County of Philadelphia, on the 15th day of June, A. D. 1848, to June Term, 1848, No. 42, in which the Mayor, Aldermen and Citizens of Philadelphia are plaintiffs, and Charles McCowen, Henry Sailor, and Sarah McCowen are defendants, the following described property, belonging to Henry Sailor, one of the said defendants, viz: All that certain messuage or tenement, and lot or piece of ground, situate on the east side of Delaware Sixth street, between High and Mulberry streets, in the City of Philadelphia, containing in breadth, north and south, twenty feet, and in length or depth ninety-six feet, bounded northward by ground now or late of William Haverstick, westward by ground now or late of Michael Herbert, southward by ground late of John Garrigues, and westward by Sixth street aforesaid, subject to a yearly rent charge or sum of one hundred and fifty dollars, payable in half yearly payments: *Provided*, the other defendants in said judgment consent thereto.

An Ordinance

To provide for the Payment of Money by the City Treasurer and Treasurer of the Girard Fund, in cases therein mentioned.

SECTION 1. *Be it ordained and enacted by the Citizens of Philadelphia in Select and Common Councils assembled*, That whenever the Mayor shall be absent from the City, or unable by reason of sickness or any other cause, to draw

warrants upon the City Treasurer, or Treasurer of the Girard Fund, for the payment of money, in such case warrants for said purpose shall be signed by the President of the Common Council for the time being; and the City Treasurer and the Treasurer of the Girard Fund shall pay all warrants so drawn on them as aforesaid. But such warrants shall in all cases be founded on a requisition of a Committee of Councils or of the Board of Commissioners of the Girard Estates as provided by existing ordinances: and such absence or inability of the Mayor shall be certified on the back of such warrants by the Clerk of Police.

APPENDIX, No. XIX.

An Ordinance

To authorize the sale of part of the Lot on which the Wills Hospital is built.

WHEREAS, James Wills, of the city of Philadelphia, by his last will and testament, bearing date the 5th day of May, A. D. 1823, did devise and bequeath to the Mayor, Aldermen and Citizens of Philadelphia, the residue and remainder of his estate, in trust, to purchase a sufficient plot of ground, in the said city or neighborhood, to erect thereon suitable buildings and accommodations for an hospital or asylum, to be denominated "The Wills Hospital for the Relief of the Indigent Blind and Lame," and to apply the income of such portion of the bequest as should remain after the purchase of such ground and the erection of said buildings, to the comfort and accommodation of indigent blind and lame: and, whereas, in execution of the said trusts, the said devisees purchased a plot of ground in the said city, bounded by Sassafras, Cherry, Schuylkill Fourth and Fifth streets, and, upon part thereof, erected the buildings aforesaid, and did and do continue to appropriate the income of such portion of said bequest, as remains unexpended, to the comfort and accommodation of the indigent blind and lame: and, whereas, a large portion of said lot is not occupied by the said hospital building, and is not necessary to the accommodation thereof, and the same is now valuable for building lots, and can be sold to advantage: and, whereas, it will accord more with the desire and intention of the said testator to accommodate and comfort as many of the

indigent blind and lame as the income of the sum for which the portion of said lot unbuilt upon can be sold will permit, than to allow the same to remain useless and unproductive—Therefore,

Be it ordained and enacted by the Citizens of Philadelphia in Select and Common Councils assembled, That the Committee on Legacies and Trusts be, and they are hereby authorized to sell, for the highest price they can obtain, for cash or upon securities of mortgages, any portion of the lot of ground, bounded by Sassafras, Cherry, Schuylkill Fourth and Fifth streets, not occupied by the Wills Hospital buildings; and to cause the city seal to be affixed to the deed or deeds conveying and assuring the same. And the said Committee shall invest the proceeds of such sale, if cash, in the loan of the city of Philadelphia, in trust, for the Wills Hospital; and, if in mortgages, shall cause to be expressed in said mortgage deeds that the same is in like trust, and shall apply the income of such investments to and for the use of the Wills Hospital aforesaid

REPORT OF THE COMMITTEE ON FINANCE.

To the Select and Common Councils:

The Committee on Finance beg leave to present herewith a resolution and a bill relating to the City Treasurer and his office.

The recent large additions to the City Loans, and the in-

creased number of its holders, and of the transfer of it; besides the gradual accumulation of business in the other departments of the City Treasurer's office, has overloaded with duties that faithful and zealous officer. The room, too, appropriated to his use is so small as materially to embarrass him and his assistants in the transaction of their official business.

The Committee have, therefore, unanimously determined to recommend to Councils to meet, as far as practicable, both difficulties. The first, by a small increase of the Treasurer's salary, to enable him to employ, (at his expense,) if he needs it, another clerk; and, the second, by appropriating to his use the small room in the rear of his present office.

It is proper to add that the actual amount at present retained by the City Treasurer out of his salary, after the payment of his assistants, is \$500 a year, though he annually receives and disburses for the account of the city about \$600,000.

Resolved, That the room lately occupied by the Mayor for a private office shall be hereafter appropriated exclusively for the use of the Committees of Councils; and the room in the rear of the City Treasurer's office shall be for the exclusive use and accommodation of the City Treasurer, and the Committee on Finance are hereby authorized to make such alterations therein and in the City Treasurer's office as they may deem expedient.

An Ordinance

To fix the Salary of the City Treasurer.

SECTION 1. *Be it ordained and enacted by the Citizens of Philadelphia, in Select and Common Councils assembled*, That the annual compensation to be allowed to the City Treasurer, for salary and clerk hire, shall be three thousand and six hundred dollars, to commence on the first day of January, 1849, payable quarterly, any ordinance to the contrary notwithstanding.

It may be proper to present herewith a synopsis of the financial condition of the Corporation:—

The whole indebtedness of the Corporation by Loans, exclusive of the Gas Loans, and of the Loans to provide for the payment of the instalments on the subscription made by Councils to the Capital Stock of the Pennsylvania Railroad Company, is - - - - - \$2,157,900 00

Add present amount of Loan for the last mentioned purpose, actually taken up on the 1st of January, 1849, \$600,000 00

Amount to be issued as required by the Pennsylvania Railroad Company, - \$900,000

Less, the return by the Co. as for interest, estimated, - - 100,000

800,000 00
1,400,000 00
3,557,900 00

From which, to exhibit the real debt, must be deducted the amount of City Loans belonging to the Sinking Fund, January 1, 1849, - - - - - \$67,100
Since purchased for it, - - - - 44,200

111,300 00
\$3,446,600 00

The above amount of \$3,557,900, falls due at various periods, on an average annually of about \$76,000, after the present year, until 1876, when the yearly sum becoming payable, will be \$250,000.

The actual annual interest which will be payable upon these Loans, including those belonging to the Sinking Fund, but taking out the Loan of \$100,000, due the 1st July, 1849, is \$185,695.

To meet which the City has a present property income, as appears by the accompanying estimates, of \$188,120 00
Deduct the interest as above, - - - 185,695 00

And there will remain a surplus of - - \$2,425 00

It will at once be perceived, that, excluding the annual appropriation to the Sinking Fund, the present income of the City from its property and taxation, will be sufficient to meet

the whole interest upon all the present Loans to the City, including those held by the Sinking Fund, and also upon the additional \$1,000,000, which must be taken up whenever the contingent subscription to that amount to the Pennsylvania Railroad Company shall become absolute, besides paying all the current annual Municipal expenditures. The Committee would be unwilling to be misunderstood for a moment as treating the annual appropriation to the Sinking Fund as less obligatory in law and morals upon the City than the annual payment of the interest on the Loans. But it is not doubted, that before the additional subscriptions referred to can be called in, the City will have paid off a portion of its debt, and made accumulations on its Sinking Fund of about \$140,000, and that in the meanwhile the valuation, upon which its taxation is laid, will be increased so as to make the same rate more productive, and that its property will yield an increased revenue. So that in every aspect in which the subject can be viewed; and assuming that the Pennsylvania Railroad Company will not earn any dividends on their stock, though they confidently assert very much to the contrary, we need have no fears as to the financial condition of the City. It ought not, however, to be forgotten that the City has made an experiment not again to be repeated, which has almost crippled the Treasury, and which will demand from us the utmost vigilance, economy and retrenchment, until the City debt shall be completely extinguished, and our citizens shall be freed from taxation, at least for interest on debt. The provision to be made this year, in consequence of the subscription to the Pennsylvania Railroad Company, for interest, and addition to the Sinking Fund, is \$105,009: which is equal to the product of the tax of about 20 cents on the \$100, or in other words, had it not been for that subscription, the taxes this year would be about 38 cents on the \$100, instead of 58 cents on the \$100, which the Committee feel bound to propose.

But still there is little fear, under the worst aspect of our affairs, by care and economy in time, practically to attain freedom from City taxes. The point is not beyond our reach, and must be steadily presented in an intelligible form to our fellow citizens, so that they may watch over the expenditures of their servants.

The investments belonging to the Sinking Fund, besides the City Loans before referred to, are worth, at their present market value, it will be seen by the accompanying statement, \$134,492 26, and the whole amount of the investments of the Sinking Fund produce yearly about twelve thousand dollars.

A Loan of \$100,000 falls due on the 1st of July next, and the Committee having uninvested funds belonging to the Sinking Fund, anticipated the payment of \$42,400 of it, by purchasing the same for the Sinking Fund at par. The Committee has also exchanged \$2,000 of the Gas Loans belonging to the Sinking Fund, for an equal amount of the first mentioned Loan, leaving still to be paid on the 1st of July next, \$55,600, which amount can be readily paid out of the cash receipts this year on account of that Fund. The sale of the Lombard street lot, now in progress, under the direction of the Committee on City Property, will increase the Sinking Fund and its income; as the proceeds of this sale belong to the Fund. But still, in order to meet the Loans of the City as they fall due, it will be necessary after this year to increase the yearly appropriations to the Sinking Fund about \$9,000. By economy, the different Committees will readily save more than this sum, and as each loan is paid off the annual demand for interest will be reduced, so that this sum can almost at once be met out of the present appropriation for interest. No notice has been taken of the Gas Loans in the foregoing statement, as the interest on them is paid by the Trustees of the Gas Works out of the income of those works—which income is not only amply adequate to the payment of that interest, but also to accumulate a special Sinking Fund for the Gas Loans, and to extend the Works. Indeed the City has a valuable property in those Works over the amount of their cost, after deducting their Sinking Fund, which is invested chiefly in Gas Loans, and altogether in City Loans.

For the information of the Councils, a statement of the different Loans is annexed to this report.

The Committee report herewith a bill making the annual appropriations, and providing for means for meeting the appropriations.

An Ordinance

Relating to Water street.

SECTION 1. *Be it ordained and enacted by the Citizens of Philadelphia in Select and Common Councils assembled,* That the Committee on Public Highways be, and they are hereby authorized and directed to pay to Elizabeth Tremper the sum of two thousand five hundred and twenty-two dollars and twenty-five cents; to Margaret Stroup, Alexander H. Bryant and Mary his wife, late Mary Stroup, in right of said Mary, and Charles Emley and Adelaid his wife, late Adelaid Stroup, in right of said Adelaid, the sum of one thousand seven hundred and thirty-three dollars and thirty-three cents; to Martha Gorman, the sum of one thousand five hundred dollars; to William Kidney, the sum of one thousand and fifteen dollars; to Robert H. Large, Trustee of Susan Wahn Hartshorn, the sum of two thousand and seventy-six dollars, and to Isaac Hacker, Trustee of William T. Bladen, and Harriet B. Hacker, the sum of one thousand three hundred and seventy-six dollars and fifty cents. The said sums being the amounts awarded to the said parties respectively as damages for injury done to their property, situate in Water street between Sassafras and Mulberry streets, by the laying out of Water street anew, as appears by the report of a jury, filed in the office of the Clerk of the Court of Quarter Sessions, on the 3d day of January, 1849.

SEC. 2. That the sum of ten thousand two hundred and twenty-three dollars and eight cents, out of the income of the fund appropriated under the twenty-second item of the will of Stephen Girard for the improvement of the eastern front of the city and Delaware Avenue, be appropriated for carry-

ing into effect this ordinance, to be paid in the manner that appropriations for Delaware Avenue are directed to be paid in the several ordinances relating thereto.

APPENDIX, No. XXIV.

To the Select and Common Councils :

The Committee on Public Highways, to whom was referred certain unfinished business of the Councils of last year, relating to the Culvert in Walnut street and Dock street,

REPORT—

That sundry Petitions relating to the said Culvert were presented to Councils of last year, and referred to the Committee on Public Highways.

That that Committee submitted to Councils a Report, (see Appendix of Journal of Common Council, No. 37,) with a Bill annexed, entitled "An Ordinance to authorize the construction of a Culvert in Dock street."

A minority Report (Appendix Journal of Common Council, No. 38,) was also made, recommending that Walnut street be designated, as the most eligible street for the continuation of the present Walnut street culvert.

On the 27th April, 1848, Journal of Common Council, page 103, the subject being then under consideration, it appears that the Bill of the Committee was so amended as to provide for the construction of a sewer, to commence at the termination of the present Walnut street culvert at Dock street, and to extend along Walnut street to the river Delaware.

Information of the Report from the Committee, and the passage of the Ordinance, was given to Select Council, and as appears from the Journal of that body, the subject was agitated on several occasions, but not finally acted on.

The Committee now report a Bill similar to the aforesaid amended Bill, and entitled "An Ordinance to authorize the construction of a Culvert in Walnut street," and recommend its passage.

Respectfully submitted,

SAUN. LEWIS, *Chairman.*
JESSE GODLEY,
JAS. J. BOSWELL,

APPENDIX, No. XXVII.

The Committee on Finance—

REPORT:

That in the Ordinance for making appropriations and raising supplies for the year 1849, there was an accidental omission to deduct from the appropriations to the Watering Committee and the Committee on Cleansing, the balances standing to their credits on the 31st of December, 1848; to rectify the omissions the following resolution is offered.

Resolved, That the City Treasurer be directed to charge the Watering Committee with the sum of \$4,504 03, and the Committee on Cleansing with \$4 57, the same being the amounts standing to their credits respectively on the books of the Treasurer on the 31st of December, 1848.

APPENDIX, No. XXXII.

To the Select and Common Councils:

The Committee on Finance respectfully

REPORT—

That they have had under consideration the Annual Report of the Trustees of the Philadelphia Gas Works, for the year 1848.

The Committee have not thought that Councils intended their attention to be directed to any other part of the Report than that, asking leave to contract a new Loan of \$100,000, for certain specified extensions of the Works. The Committee are of opinion that in order to meet the present and daily increasing demand of customers of gas, the proposed loan should be granted, and the designed extension of the Works immediately made. Besides, the prosecution of the whole proposed extension at the same time will be the most economical mode of effecting the object, as it is believed that the difference in cost between making the whole extension this year, or in this and the next year, will be \$10,000.

The Committee beg leave to submit an estimate of the Trustees, together with the annexed bill.

OFFICE PHILADELPHIA GAS WORKS,
March 15, 1849.

DEAR SIR—Agreeably to your request, I send the following estimate, of the size and quantity of the iron mains, that are deemed necessary for giving such a supply and pressure of Gas throughout the City, as will be generally satisfactory.

12,000 feet of 16 inch in Mulberry and Ashton streets, with branches, drips, &c.,	- -	\$36,000
2,000 feet of 8 inch in Vine and Cedar streets,	-	30,000
2,000 feet of 20 inch in Ashton street, to connect mains,	- - - - -	8,000
15,000 feet of 6 inch to connect the cross streets with large mains,	- - - - -	15,000
4,000 feet of 10 inch, for do. do.,	- - -	7,000
Making new outlets at the Works to correspond with the large mains with governor valves, &c.,		3,000
		<hr/>
Total,		\$99,000
		<hr/>

Say one hundred thousand dollars.

The above estimate of cost, is based upon the present prices of iron; but as they are advancing, the cost may be increased by delay. As the season for executing such work is now at hand, considerable embarrassment in making contracts on reasonable terms, will be experienced a few weeks later.

The Trustees consider these additional mains, to be absolutely necessary, for affording such a supply of Gas to the customers of the Works, as ought to be furnished, and they are, in a great measure, independent of the distributing pipes contemplated to be laid out of the annual appropriation from the profits. The application for the extension of the lines of small mains, and the supply of service pipes and meters to the customers who are daily coming in, will absorb nearly the whole of that annual appropriation, and increase the difficulties now experienced, from a deficiency of supply and pressure in the depressed points of the City.

If the appropriation should be made this evening, the whole of the large mains can be obtained, and the principal difficulties be overcome before the heavy autumn demand commences.

Yours very respectfully,

F. FRALEY, *President.*

JOHN C. DAVIS, Esq.,

Chairman Finance Committee.

A Further Supplement

To an Ordinance, entitled "An Ordinance for the construction and management of the Philadelphia Gas Works."

SECT. 1. *Be it ordained and enacted by the Citizens of Philadelphia in Select and Common Councils assembled,* That for the purpose of enabling the Trustees of the Philadelphia Gas Works to purchase such additional iron mains of sufficient size to distribute the Gas supplied from said Works to all parts of the City in adequate quantities, and with proper pressure, and to make the needful connections with the Works, the Mayor of the City is hereby authorized and required to borrow on the faith of the City, whenever the said Trustees may request the same, such sum of money, not exceeding one hundred thousand dollars in the whole, as may be needed for the purposes aforesaid.

SECT. 2. That the Certificates to be issued to the lenders of the money so borrowed, shall bear an interest not exceeding six per centum per annum, payable half yearly, on the first day of January and July, and be redeemable on the first day of January, Anno Domini one thousand eight hundred and sixty-nine: and be in like form, and transferable in like manner, with the certificates of the other loans authorized for the purpose of said Gas Works.

SECT. 3. That the said Trustees shall set apart out of the profits of the said Gas Works, the sum of ten per centum per annum on the amount borrowed by virtue of this Ordinance, for the purpose of paying the interest thereon: and such part of the said ten per cent. per annum as may not be required for the purpose of paying said interest, and the accumulations thereof, shall be invested in the same manner and for the same purposes as the other appropriations to the Sinking Fund of the said Gas Works are now directed to be invested, accumulated, and applied.

APPENDIX, No. XXXIII.

To the Select and Common Councils:

The Committee on Police, to whom was referred the memorial of High Constables Walker, Curran, Winnemore, and Moore, asking an increase of their several salaries, to six hundred dollars per annum,

Respectfully submit:—

That the request of said memorialists is entitled to a favorable determination by Councils, from consideration of the personal qualifications, and the requirements of duty, implied, enjoined and performed; moreover it seems to your Committee both reasonable and just that these officers, having the special supervision of the police throughout the city during the day time, they should be paid a compensation at least equal to that received by the several captains of the night police—whose duties are not more extensive or responsible, and whose personal expenses must obviously be less.

Your Committee therefore, further respectfully submit, the annexed draft of an Ordinance.

A Further Supplement

To an Ordinance, entitled “An Ordinance to establish a Day and Night Police, and to provide for the lighting of the public lamps in the City of Philadelphia,” passed on the 16th of March, 1848.

SECTION 1. *Be it ordained and enacted by the Citizens of Philadelphia in Select and Common Councils assembled,* That from and after the first day of March, A. To the Select and Common Councils :

The Committee of Visitation of the Girard College for Orphans, appointed for the months of February and March,

REPORT—

That in conformity to the Ordinance of November 9th, 1848, they visited the College once in each month, and was pleased with the order and cleanliness of the Institution. The several departments appeared to be conducted with a proper regard to the directions of the Founder. They inspected the accounts and minute books of the Directors,—the accurate manner in which they are kept is highly creditable.

The arduous duty of supplying the buildings with suitable furniture, books, and all things needful to carry the general design of the munificent Testator into execution, has been performed by the Directors in a very liberal manner. This benevolent Institution is now in active operation, with two

hundred and eight Orphans enjoying its advantages, and your Committee indulge the hope, that with a proper regard to economy in the expenditures, the cherished hopes of the Testator and the public may be realized.

Resolved, That the memorial of occupants of stalls in the Second Street Market House, complaining of the occupancy of the sidewalks by persons who pay no rent, be referred to the Committee on City Property, and the Committee on Police be discharged from the further consideration of the same.

APPENDIX, No. XXXVII.

To the Select and Common Councils.—

The Committee on Police, to whom was given the following instructions, viz :

“ *Resolved*, That the Committee on Police be requested to examine into, and report, whether the number of policemen attached to the Mayor’s office may not be reduced without injury to the public interests,”

Respectfully beg leave to state :—

That, in obedience to requirement of said resolution, they have carefully investigated the subject committed, and in the course of the inquiry have examined the report of Committee on Police, which originated the system. It appears from this document, dated December 9th, 1841, that their attention was “ very soon after their organization directed to a more perfect and useful arrangement and employment of the police of the city ;” and “ desirous to avail themselves of all the means within their reach, promising to aid them in the attainment of these important objects, the Committee requested the co-operation of the Mayor, [John M. Scott,] who united with them, and to his knowledge of the practical operations of the [then] present system, and the changes by which existing deficiencies may be remedied, and increased strength and activity given to the entire department, the Committee are much indebted for the plan” which they submitted, and which, after being modified, was enacted by Councils into an ordinance on the 23d day of December, 1841.

The portion of this ordinance to which the inquiries of your Committee have been particularly directed, creates and establishes a department of police for the *more effectual prevention and detection of crimes*, and which department shall be *especially and particularly devoted to those purposes* ; and provides for the appointment of *peculiar officers*, viz : a Lieutenant of Police, a Second Lieutenant of Police, and a Special Constable, aided by the Clerk of Police. The Lieutenant of Police shall be the head of this department, and shall be chiefly responsible for its fidelity and efficiency in carrying out the purposes of its creation. The Second

Lieutenant of Police shall co-operate with him and submit to his direction, and in his absence shall fill his place as head of the department. The Special Constable shall obey all the lawful orders of either the Lieutenant or Second Lieutenant of Police; and *all* shall be in subordination to the Mayor. It is also enacted, that the operations of this department, whenever occasion shall require, shall receive aid from the various officers of the other branches of the police of the city, in such manner, by such assignment of officers, and under such rules, temporary or permanent, as the Mayor may from time to time direct, &c.

During a lapse of more than seven years, experience and observation have devised or suggested no alteration in this branch of our police system—except to increase its strength commensurate with the increase of business in the Mayor's office by the appointment of a *second* special constable. Meantime it has been found necessary to modify almost every other part of the same system, whilst this, the nucleus, remains essentially as it was originally enacted, and has since been found altogether adequate to the purposes it was designed to effect by the enlightened policy and forethought of its framers. The salutary operations of its provisions are sufficiently apparent: thus—while the several branches of the Night, and of the Day police, are alternately employed in their rounds of duty, guarding against infractions of law, or detecting its violators, *within their prescribed beats, or stations*, throughout the city—the policemen attached to the Mayor's office, are required to be at all times prepared and ready to meet exigencies wheresoever they may occur. Hence these officers are indeed the immediate *right-hand agents* of the Mayor, who, deprived of their services, would be prevented affording that prompt and effectual assistance needful to answer the multifarious and oftentimes sudden calls or emergencies that happen throughout the day, as well as night time.

It is evident, therefore, to your Committee, if any defect appears to be connected with this branch of the police, it ought to be ascribed to delinquency in the ministration of the provisions of the ordinance, and not to its intrinsic deficiencies.

Your Committee hence are of opinion, that it is inexpedient to reduce the number of policemen, [five] referred to; and they are further of opinion, that the vacancy in the office of lieutenant of police, should be forthwith filled in order to preserve and maintain efficiency in this important branch of our police system.

Your Committee further beg leave to submit the resolution annexed, and respectfully ask the adoption of the same by Councils.

To the Select and Common Councils:

The Committee on Public Highways, to whom was referred a Petition of the "North American Telegraph Company" asking permission to carry their wires from their office, (which is located on the south side of Chesnut street, west of Delaware Third street,) up along the north side of Chesnut street, thence along Fourth street to High street, and thence along High street and across the Permanent Bridge, and to use the Piers of said Bridge, and to erect Poles along the said route, Respectfully Report:

That Councils have granted on two occasions applications of a similar tenor;—one on the 23d October, 1845, to the Magnetic Telegraph Company, and the other on 23d December, 1847, to the New Jersey Magnetic Telegraph Company under Houses' Patent. That with these precedents before them, the Committee feel justified in reporting favourably on the petition; but with certain modifications and restrictions. It is proper to advert to the character and condi-

tion of the poles now used; most of them, not such as the communications presented to Councils indicated, nor in conformity with the instructions of the Committee on Public Highways, being unsightly, defective in strength, and placed at too great distances apart. While it is believed, that the citizens are willing to submit to some inconvenience for the general good; it is right that they should be protected by wholesome regulations. The Committee have considered a suggestion made to them to grant a new line of Posts along George street, but they deem this course inadvisable.

And offer the following Resolution.

Phila., May 24, 1849.

Resolved, That the North American Telegraph Company be authorized to run their wires across and along the Piers of the Permanent Bridge at High street, thence along the south side of High Street to the west side of Delaware Third street, thence along the west side of Delaware Third street, as far south of Chesnut street as may be necessary for their accommodation; and also to run a line of wires, along the East side of Delaware Third street from Chesnut street to the North side of Vine street. That the Posts shall be dressed smooth, like a spar or mast, painted, and shall be not less than Ten inches in diameter at the base, and not less than Five inches in diameter at the top; they shall be not less than twenty-five feet high, and as nearly as practicable, be placed one hundred and fifty feet apart. That the Poles now placed on the said routes, so far as they shall conform to the foregoing directions, shall be for the joint use of the Companies now using them, and the said North American Telegraph Company; and so far as they shall not comply with the foregoing regulations, new Posts shall be placed by the said North American Telegraph Company, for the joint use of themselves and of the aforesaid Companies. The said Posts to be so arranged as to conform throughout, as nearly as practicable, to the foregoing regulations. Provided always, That the Councils reserve the right to alter, amend, or rescind this resolution, and the license hereby granted, as the interests of the City may require.

APPENDIX, No. LX.

To the Select and Common Councils of the City of Philadelphia:

The Committee on the Library beg leave to Report:—

That Mr. Vattermere, the Agent of Paris, for international exchanges of books, charts, plates, &c., has presented to the Corporation of Philadelphia, a considerable number of useful books and prints, a catalogue of which is appended to this Report. Some of them are in Royal folio, executed on fine paper, and in the best style of typography. One of them is a history, statistical and architectural, of the *Hotel de Ville*, illustrated by rich engravings. All of these books are in the French language.

Among these works, are several which treat of subjects connected with the administration of municipal affairs, and deserve a place in our collection. Others are purely scientific, and some are treatises on medical subjects. Those not relating to civic concerns, though given to the City, are intended by the donor to be placed with some appropriate institution. Their disposal is submitted to the Corporation, as a matter of pure discretion. The design is to effect a reciprocity of benefits by mutual exchanges of books, charts, and engravings on all subjects, but the character of his mission prevents Mr.

Vattemere, as the agent specially appointed by the City of Paris, from corresponding with other than municipal or public bodies.

In presenting these books to the City of Philadelphia, the agent aims at a more extensive result than such an interchange as this Corporation is of itself able to accomplish. The object is to induce learned institutions as well as private persons to exchange such works as they can spare in return for such as he can furnish. He hopes to receive duplicate copies of our municipal publications, but these are all he expects from a City legislature. Our instrumentality is desired as the medium through which exchanges may be effected with private persons and the learned institutions of Philadelphia. It is only just however, that we should incur, at a future day, our portion of an expense which these exchanges devolve, as the citizens of Philadelphia will participate in the widespread benefits they confer.

The Corporation of Philadelphia, is therefore approached as a *means* or *medium* by which a commerce of intellectual exchanges may be brought about between the cultivated mind of France and Europe, and the cultivated mind of our own community. The City of Paris, as the agent for international exchanges with the rest of Europe, is able to give us all that is valuable in science, in literature, and in art, or in legislation. For these rich treasures, our own works are asked in return. The opportunity is presented by diffusing these works abroad, to make known to France and the old world, the mental activity of our people, and the theory and working of our institutions. On these subjects the greater part of Europe is profoundly ignorant, and the policy of a portion of the European press being to shut out from their people the means of just or favorable appreciation, a powerful corrective may be supplied through the agency of such exchanges. The works sent abroad under the auspices which direct the movements of Mr. Vattemere, have the best chance of becoming known to the leading men of Europe in all the departments of mind; to those who mould the characters and govern the sentiments of the masses around them.

Entertaining these views, the Committee believe that Councils would be only discharging a duty which they owe to this community to invite societies, corporations and private persons to co-operate in the design and aid it by every means in their power. For this purpose the Committee suggest that the library room be selected as a place for the deposit of all

such books, charts, or otherwise as may be intended by our citizens and learned societies for Mr. Vattermere, and that the exchanges be conducted under the direction of this Committee.

They subjoin resolutions to this effect.

Resolved, That the thanks of the Select and Common Councils of Philadelphia be presented to Alexander Vattermere, the agent of the City of Paris for international exchanges, for his acceptable donation of books and plates; and that the Committee on the Library be authorized to furnish him with a bound copy of the minutes of the Corporation from 1704 to 1776, of the minutes of the Committee of Citizens of 1793, of the Journals of Councils, of the Digest of Ordinances, and a duplicate copy of any other printed matter which may be in the collection, or in charge of the Committee.

Resolved, That the Committee on the Library be authorized to send any books presented to the City of Philadelphia, by the agent of the City of Paris, which are not wanted for municipal purposes, to such appropriate institutions as they may select; and the said committee are hereby authorized to make known through the press, that they will receive and superintend the delivery to Alexander Vattermere of any American books, charts or plates which any portion of the Philadelphia public may desire to exchange for printed works of European origin.

An Ordinance

For the Suppression of Nuisances.

SECT. 1. *Be it ordained and enacted by the Citizens of Philadelphia, in Select and Common Councils assembled*, That it shall not be lawful for any person to sprinkle or wet with water any portion of the pebble pavement of any of the streets, lanes, courts or alleys within the City, after the hour of 9 o'clock in the morning, or before the hour of 4 o'clock in the afternoon. But that it shall not be lawful at any time to sprinkle any of the said streets, lanes or alleys from water accumulated in, or running in any of the gutters thereof.

The Committee on Public Highways, Report :

That they were directed by a "Resolution of Councils of the 15th of March last, to cause a Topographical Survey to be made of the region of Dock street, with a view to ascertain the best system of Drainage; the cause of occasional overflows of water to the cellars on that street, and the effect, if any, of the tides from the Delaware river, and of the present culvert; also whether a tight and strong culvert in Dock street would be sufficient for the district drained by Dock street, with the cost thereof, and how far the evil complained of may be remedied by a culvert down Walnut street from the point of Dock street; together with the best mode of constructing the same so as to do the least possible injury to the wharves and shipping, with an estimate of the cost of such construction."

That they appointed to make the inquiries and estimates set forth in said resolution, John C. Cresson, Solomon W. Roberts, and Philip M. Price, Esqs. who, on the 13th of June 1849, made the annexed report to your Committee, recommending the construction of a Sewer down Walnut street.

The Committee report the annexed Bill for the consideration of Councils, and ask Councils to pass the same into an ordinance.

All of which is respectfully submitted.

To the Committee on Public Highways of the City of Philadelphia.

GENTLEMEN :—

The undersigned, Commissioners appointed under the resolution of Councils, passed on 15th of March last, directing "that a topographical survey should be made by three persons "who shall explore the region of Dock street, with a view to "ascertain the best system of drainage; the cause of the occa-

“sional overflows of water to the cellars on that street, and the effect, if any, of the tides from the Delaware river, and of the present culvert;—also, whether a tight and strong culvert in Dock street would be sufficient for the district drained by Dock street, with the cost thereof, and how far the evil complained of, may be remedied by a culvert down Walnut from the point of Dock street, together with the best mode of constructing the same, so as to do the least possible injury to the wharves and shipping, with an estimate of the cost of such construction,” have the honor to present the following

REPORT.

On the 22d of March, a few days after receiving the notification of their appointment, they held a preliminary meeting at the office of the City Surveyor, and continued to meet from time to time, as frequently as their other engagements allowed. After organizing by the appointment of one of their number as Chairman, they proceeded at once to the examination and consideration of various documents and maps which it was understood had been referred to them. These consisted chiefly of petitions and remonstrances, presenting the views and arguments of the advocates, and the opponents of the different schemes for the relief of Dock street, which have engaged the attention of Councils.

They subsequently explored the region of Dock street, examining several of the cellars, and hearing the statements of the occupants of the premises, and visited the wharves and docks in the vicinity of the outlets of the sewers both in the city and adjoining districts, north and south; at several points soundings were made and information was sought and obtained from persons who have been some time familiar with the localities.

An exploration of the Dock street sewer by entering the outlet at the river, was attempted, but was frustrated by the dilapidated condition of a portion of the culvert in the wharf, the top logs of which have become so much depressed, as to touch the surface of low water. An examination of part of the sewer west of Front street, was subsequently made by Mr. Chandler, the Assistant City Surveyor, who kindly volunteered to perform the unpleasant duty, and succeeded in accomplishing it by entering at an opening in the vicinity of the Tobacco warehouse. A report by Mr. Haines, late City Surveyor, to a Committee of Councils last year, a copy of which has been placed in our hands, furnishes an estimate of the extent of sewerage emptying into that of Dock street, and

a statement furnished by Mr. Kneass, the present City Surveyor, makes known the area of surface drained into this channel.

The form, dimensions, and structure of the sewer in Dock street, have been derived from a report by Mr. Haines, of an examination made in 1843, by one of the City Commissioners and the City Carpenter. The grade lines of this sewer and of the several points of the surface desirable to be known, have been ascertained by consulting the sectional sketches of them found in the Surveyor's office. As all the facts supposed to be relevant to the subject were found to be derivable from the several sources above enumerated, it was not deemed necessary to make an instrumental topographical survey, and none has been attempted. Upon collating the facts derived from these sources, and duly considering the whole subject, it is believed that the following brief summary presents most, if not all, of the important points in their proper connection.

The sewer in Dock street is composed of several sections constructed at different periods, of various materials; some of stone and brick, and others of timber; some of circular section, some semi-circular or D shaped, others rectangular. The area of cross section at the largest part being 140 square feet, and at the smallest about 45 square feet, with portions of intermediate sizes, averaging 60 square feet; the smallest are discovered being within 100 feet of the outlet at the river. This irregular structure has been located in a soil that is of marshy and unstable character, replete with land springs, which have their outlet through the sewer.

Its imperfections are obvious; but the practicability of remedying them without encountering a very great, and at present indeterminable expenditure, is by no means so evident.

The depth of the bottom of the sewer below the street pavement, could not be ascertained by actual measurement, but is believed to vary from 12 to 15 feet: the floors of the cellars examined were represented to be so nearly level with the top of the sewer, as to be completely drained at all stages of the tide when no rain was falling; which statement is corroborated by an examination of the grades of the sewer and the street, given in the profile made by the late City Surveyor. From the report of Mr. Haines, it appears that more than four and a half miles of sewers lead into this one channel; and the statement of Mr. Kneass shows, that rather more than half a square mile, or nearly sixteen millions of square feet of surface drain into it, being somewhat more than one quarter the entire area of the city proper.

When rain falls at the rate of one inch an hour, which is an event of not unfrequent occurrence, the quantity of water draining from this surface is about twenty-two thousand cubic feet per minute, sufficient to fill the entire sewer in Dock street in about five minutes, and requiring a head of more than three feet to pass it through a clear opening equal in size to the smallest cross section of the sewer. The resistance due to its length, irregular form and tortuous direction, would probably require this head to be doubled.

During the disastrous storm on the first of July, 1842, there fell nearly six inches of rain in two hours, yielding nearly three times the quantity of water just estimated, and consequently capable of filling the entire sewer in less than one minute and a half, which is a period entirely too brief for its contents to be evacuated under any head that the situation will admit, without completely inundating the adjacent grounds to the depth of several feet; should a tide of extraordinary height concur with a heavy rain, the danger must be much increased.

Upon ascertaining these facts, there seems to be no room for doubt as to the principal cause of the inconvenience and damage occasionally suffered by the owners and occupants of property in the vicinity of Dock street. The insufficient capacity of the sewer for the effectual discharge of the surface drainage of the large area for which it has been made the only outlet, is undoubtedly the primary cause of the difficulty; and the imperfect condition of some portions of it very much aggravates the evil. The repair of these delapidated parts, and removal of the deposits of mud lying on the bottom will, it is believed, diminish the frequency of the inundations of the vicinity; but it is not probable that a complete and reliable remedy will be obtained, without considerable addition to the capacity of the underground channel from the corner of Dock and Walnut streets to the river. To undertake an enlargement, or extensive repair of the Dock street sewer, without first making some adequate provision for the independent discharge of the large volume of water conducted to this quarter, must be considered extremely hazardous, if not entirely impracticable; and the treacherous character of the soil in Dock street, renders the attempt to construct another sewer alongside the present one scarcely less hazardous; the cost of either work would undoubtedly be very great, and cannot with certainty be estimated within some tens of thousands of dollars. The cheapest, safest, and most efficient improvement of the drainage of this district will, in our opinion, be obtained

by the construction of a culvert in Walnut street from the intersection of Dock street to the Delaware, pretty much in accordance with the plan drawn by the late City Surveyor, now on file in the Office. This culvert should be of circular or elliptical cross section, not less than eight feet diameter, or equivalent area, and should be extended through a pier to the verge of the Warden's wharf line, debouching in deep water entirely below the level of low tide.

The question of probable injury to the shipping interests in the vicinity of this outlet, is one that has claimed our serious consideration. Having been informed that the water has been shoaling considerably in the neighbourhood of the sewer constructed in Christian street a few years ago, we visited the place, and upon inquiry found that our information was correct; we did not, however, perceive any sufficient reason for supposing that the effect was due to the action of the culvert, but was a part of the general accumulation of sediment, which has for many years been depositing along the river shore, from the Navy Yard nearly to the City line.

The Peg's run sewer probably carries down a larger proportion of garbage and silt than any other in our vicinity; a long pier has recently been constructed on the south of its outlet, making a narrow dock of considerable length, in which the stream passes from the mouth of the sewer to the river channel; no accumulation is observable at the end of the pier, although the bed of the dock presents a very disagreeable mass of mud. Nor does there appear, so far as we have been able to learn, to be any sedimentary deposit in the river from the sewers at Mulberry, High, or Dock streets; the large accumulation of deposit in the Spruce street dock which has sometimes been attributed to the latter, having evidently been derived from silt brought down by the surface water from Spruce street, mingled with oyster shells cast overboard from the numerous boats frequenting that locality.

The peculiar contour of the river shores, and the position of Windmill Island, give direction to the tidal currents which has the effect of cutting away the river bottom along the entire city front, and producing a gradual increase of depth of water at the ends of the projecting wharves; and as this operation is known to be especially effective in the vicinity of Walnut street, there does not appear to be any reason to apprehend an accumulation of deposit from a sewer emptying at that point. But as the protection of the valuable berths for large ships located in the neighbourhood, from even a remote danger of injury, should be an object of primary importance, we

would recommend that every possible precaution should be taken to guard against such contingency. Not only should the sewer be located in a pier on the south side of Walnut street, extending to deep water, as before suggested, and be sunk below low tide, to prevent the exit of offensive effluvia; but care should be taken to leave unobstructed the sluice way at the head of the dock, carrying the sewer over the top of it in a trunk of timber or cast iron, and to arrange the connection with the old sewer at Dock street, in a way that may form a dirt trap, which shall prevent the entrance of the ordinary silt into the Walnut street branch, by making the level of the bottom of the new sewer, a foot or more higher than the old one at the junction.

The present sewer in Walnut street, west of Dock street, appears in the sectional draft to be slightly above that in Dock street, and it will only be necessary to start the new one on the same or a little higher level to attain this object. The connection between the Walnut street and Dock street sewers, ought to be preserved as at present, without diminution of size, so as to give the full benefit of both channels for venting heavy rains. From the general tenor of the facts and opinions above set forth, it may be inferred that we think favorably of the proposition for a culvert down Walnut street; to prevent all misapprehension on this point, it may be proper to add that we unhesitatingly recommend the adoption of this course in the first instance, and secondly, the repair of the defective portions of the old culvert; particularly that near the wharf at the foot of Dock street, as soon as practicable.

The resolution under which the commission was appointed, requires an estimate of the cost of carrying the several schemes enumerated into effect; but the time which we have been able to devote to the subject has not been sufficient, to permit us to enter sufficiently in details to form an estimate that can have any pretension to strict accuracy.

From the best information it has been in our power to obtain, respecting the character of the ground in Walnut street, we see no reason to suppose that the cost of constructing a culvert there chiefly by tunneling, will be greater than in High street; and as the one now proposed will be shorter than the one lately made in that street, in nearly the same ratio that its capacity will be greater, we shall not greatly err in estimating its cost at the same amount, say in round numbers about ten thousand dollars. To arrive at a correct idea of the cost of the wharf pier containing the extension of the sewer beyond the dock, will require a set of soundings

and measurements, that can be best made by practical wharf builders; but supposing the depth of water to be about 50 feet at the outer end, and 25 feet at the head of the dock, the pier being 28 feet wide and 132 feet long, with suitable provision for the sluice way, and connection with the culvert on shore, we would consider the sum of five thousand five hundred dollars, to be a safe estimate of its cost.

Of the probable expense of repairing the dock street sewer, the first elements for an estimate have not been obtained; nor can they be had without a thorough subterranean examination, and openings at the surface of sufficient magnitude to exhibit the extent of the dilapidation. Whatever this may prove to be, there can be no doubt not only of the propriety, but also of the necessity of taking it in hand at an early day, as the present condition of this important work subjects a number of our fellow citizens to continued hazard of serious loss of property, and the public at large to risk of disease, arising from the occasional overflow of the noxious and filthy stream for which the sewer has been made the channel of discharge.—All of which is respectfully submitted.

An Ordinance

To authorize the construction of a Culvert in Walnut street.

SECT. 1. *Be it ordained and enacted by the Citizens of Philadelphia in Select and Common Councils assembled,* That the Committee on Public Highways cause to be constructed by contract or otherwise, a culvert in Walnut street to commence at the termination of the present Walnut street culvert at Dock street, and to extend along Walnut street eastward, to a point seventeen feet east of Delaware Avenue, with suitable openings in the same, and to be of a diameter not less than eight feet six inches in the clear, according to a plan drawn by Samuel H. Kneass, Principal City Surveyor and Regulator, dated July 5, 1849, and to extend from said point into the river Delaware, through a pier hereafter to be provided for.

APPENDIX, No. LXIII.

The Committee on Public Highways, Report the annexed Resolution relative to the paving and re-paving of certain streets —also a Bill providing for the construction of a Culvert in Juniper street, and an ordinance relating to Water street.

All of which they recommend Councils to pass.

Resolved, That the City Commissioners, under the direction of the Committee on Public Highways, be directed to regulate, curb and pave Ann street from Schuylkill 4th to 5th street.

And to re-pave Lawrence street from Twelfth to Juniper street, and Lybrand street from Sassafras street to a point two hundred and sixty-six feet northward therefrom.

An Ordinance

To authorize the construction of a certain Culvert.

SECT. 1. *Be it ordained and enacted by the Citizens of Philadelphia, in Select and Common Councils assembled*, That the City Commissioners under direction of the Committee on Public Highways, cause a culvert to be constructed in Juniper street, to commence at the termination of the present culvert on the north side of Cherry, and to extend northwardly along Juniper street to the north side of Sassafras street, with suitable openings in the same; and to be of a diameter not exceeding three feet in the clear.

An Ordinance

Relating to Water Street.

SECT. 1. *Be it ordained and enacted by the Citizens of Philadelphia, in Select and Common Councils assembled*, That the Committee on Public Highways be, and they are hereby authorized and required to pay to Alexander Rankin, the sum of one thousand four hundred and fifty dollars, which amount he has agreed to accept as compensation for injury done his property, situate on the west side of Water street, commencing at the distance of one hundred and seventy-three feet from the north side of Mulberry street, and extending in

front on said Water street, northward thirty-two feet six inches, by taking a portion thereof from the front on said Water street, by the laying out of Water street anew. And to pay to Hugh Carlin the sum of five hundred and fifty-three dollars and fifty cents, which amount he has agreed to accept as compensation for injury done his property, situate on the west side of Water street, commencing at the distance of two hundred and five feet six inches from the north side of Mulberry street, and extending in front on said Water street, northward thirteen feet six inches, by taking a portion thereof from the front on Water street, by the laying out of Water street anew.

SECT 2. That the sum of two thousand and three dollars and fifty cents out of the income of the fund appropriated under the twenty-second item of the Will of Stephen Girard for the improvement of the eastern front of the City and Delaware Avenue be appropriated to the expense of carrying into effect this Ordinance, to be paid in the manner that appropriations for Delaware Avenue are directed to be paid in the several ordinances relating thereto.

APPENDIX, No. LXIV.

To the Select and Common Councils:

The Committee on Legacies and Trusts, in compliance with the Ordinance of January 19th, 1843, supplementary to the Ordinance of May 21st, 1840, made their annual visit on the 12th and 13th of June last, to the Fire Engine and Hose Companies of the City for the purpose of inspecting their apparatus and inquiring into their condition and efficiency for public service;—and Report,

That their visit was confined to the Companies that have accepted of the provisions of the ordinance of January 4th, 1844, entitled “An Ordinance for the better regulation of the Fire Department,” and the several supplements thereto. These Companies they found in a high state of preparation for active service, with the exception of the Washington Engine, which had been recently injured, and was temporarily withdrawn from the service, in part on account of the injury, but in part and prudently in order to allay an excitement which had exhibited itself in a large number of evil disposed young men who were in the habit of collecting in the vicinity of the Engine house. The Committee recommend that the annual appropriation of \$300 be made to this Company as well as to the Companies named in the subjoined table, amounting in all to Seven Engine and Eleven Hose Companies.

The Washington Hose Company, which had withdrawn from the number of accepting Companies, asks again to be admitted, and the petition was referred by Councils to this Committee. The withdrawing of this Company, it is alleged, was occasioned by alien influence and the strength of the junior members; that this has been overcome by the senior members, and the Company is disposed to comply in every respect with the ordinances. This your Committee was happy to learn, and believe that henceforth this Company may be numbered with those anxious to perform active and beneficial service to the public—as however this disposition in the Company was not manifested, nor Engineers elected until after the 3d Wednesday in January last, they cannot receive the customary annual appropriation without infringing on the ordinances—and no appropriation was made by Councils for their use in the bill prepared the 8th of February last. The Company must therefore look forward to the next year, when by a continuance in the path of duty now determined upon, they will be entitled to hold rank with the other accepting Companies, and receive from the City the customary appropriation,

Annexed is a resolution which the Committee recommend should be passed.

The Committee also visited the Wills Hospital, which they found in its usual high state of good order and management.

All of which is respectfully submitted.

To the Select and Common Councils of the City of Philadelphia:

The Sanitary Committee respectfully report, that since their appointment they have met daily, Sunday included, in the Common Council Chamber at 12 M., and that they have diligently attended to the duties of their appointment.

Among these duties the Committee thought it incumbent on them to cause places of shelter to be provided for such families residing in the City as shall be removed from their homes by the order of the Board of Health and who shall be unable to obtain new residences. Such removal will occasionally be not less essential to the general health of the City than to the safety of those who are removed. To turn such persons into the streets would be unchristian and inhuman; it would be scarcely less wrong under present circumstances to send them to the Alms House—and even if that institution were not a focus of disease, it would be unjust by the exercise of public authority to pauperize those who are supporting themselves by their own industry. The Committee deeming it the duty of the Guardians of the Poor, (it certainly is not of the Board of Health,) to supply these places of shelter requested them to do so;—but as no practical action has been obtained from this request, the Sanitary Committee at yesterday's session ordered the immediate provision of shelter for the class of persons referred to. As the order was made without the authority of Councils until confirmed by them, it must rest upon the individual responsibility of those who made it.

The Committee however, do not for a moment doubt that they will receive from Councils the ratification of their act which they respectfully solicit, and submit the accompanying resolutions.

Resolved, That Councils approve of the action of the Sanitary Committee in providing places of Shelter for families resident in the City who shall be removed by the Board of Health from their houses during the prevalence of the Cholera, and that admission to such places shall be obtained by the order of the Chairman of the Sanitary Committee on the recommendation of the member of Councils in whose district the removal shall be ordered.

Resolved, That the expenditures of the Sanitary Committee shall be certified by its chairman from time to time to the Chairman of the Committee on Cleansing, who shall therefore draw a requisition for the amount so certified, which shall be charged to the appropriation of \$10,000 made to the Cleansing Committee, on the 7th day of June last.

To the Select and Common Councils:

An Ordinance

To fix the regulation of ascents and descents in Delaware Third and Branch Street.

SECT. 1. *Be it ordained and enacted by the Citizens of Philadelphia, in Select and Common Councils assembled,*

That the regulation of ascents and descents on the west side of Delaware Third street from Branch to Sassafras street, and on the South side of Branch street from Delaware Third street to a point three hundred and twenty-five feet westwardly therefrom shall be and the same are hereby fixed and established according to a plan hereto annexed made by M. The Committee on Police to whom was referred the memorial of six members of the corps of lamp-lighters, asking for an increase of their monthly pay; representing as a reason, "that the monthly pay of ten dollars under the high state of common necessities of life is insufficient to meet the daily wants of themselves and families,"

Respectfully report:—

That an application of a similar nature was determined by Councils on the 7th of March last; and the main reason assigned by your committee, who suggested the inexpediency of acceding to the proposition then, was and still continues, in their judgment, worthy of consideration; especially, when it is understood that the services rendered occupies but a small portion of time, say not exceeding about *three* hours per day during three weeks of each *lunar* month. Hence there appears to be no reasonable grounds to change the decision already recorded, that it is inexpedient to grant the prayer of your petitioners, and your Committee further beg leave to offer the resolution annexed.

APPENDIX, No. LXIX.

The Committee on Public Highways, Report,

That by an ordinance passed 5th July, 1849, entitled "An ordinance to authorize the construction of a culvert in Walnut street" they were authorized to cause a culvert to be constructed in Walnut street from the termination of the Walnut street culvert at Dock street to a point seventeen feet east of Delaware avenue, and to extend from said point into the river Delaware through a pier thereafter to be provided for; that they made application to the Directors of the Camden and Amboy Rail Road Company for permission to extend the said culvert into the river through their wharf and pier adjoining Walnut street on the south: and that the said Directors have refused to grant such permission.

By existing acts of assembly the corporation have the authority to extend culverts through private property, upon making compensation for any damages sustained thereby, notwithstanding the owner of such property refuse to consent to such extension; yet under present circumstances the Committee do not recommend that this authority should be exercised in this instance, but they prefer that Councils should authorize them to extend the culvert to the foot of Walnut street, and report an ordinance for that purpose.

APPENDIX, No. LXXII.

GIRARD COLLEGE, AUGUST 16th, 1849.

To the Select and Common Councils :

GENTLEMEN.

I have been instructed by the Directors of the Girard College for Orphans to transmit to you the accompanying plans and estimates of the cost of a Suitable Building, Steam Engine, and other apparatus and Fixtures for supplying the establishment with water and increasing its accommodations for other purposes connected with the cleanliness, health and instruction of the pupils. The supply of water is now so inadequate and uncertain as to require immediate attention, and the structures which it would be necessary to erect in order to store and distribute a sufficient quantity of it may and ought to be so arranged as to serve for the other purposes above suggested, acting upon this view the directors have caused the plan to be so prepared as to ultimately embrace all, while the expenditures upon them may be progressive and the completion of the whole be spread over such period of time as the other claims upon the income of the College Fund may render necessary. By reference to the plan it will be perceived that the board proposes to erect a plain but substantial stone edifice fifty feet wide by one hundred feet long three stories in height with convenient and airy cellars under the whole, and with a suitable offset for containing the boiler and furnace of the steam engine so as far as practicable to secure safety from fire and explosion. The cellars will be occupied as an engine room and work-shop and for storing fuel and vegetables &c. The principal story will contain a washing and ironing room, a bake house, and a room which may hereafter be used as a bathing room or as an additional work-shop. The second story will contain two large drying rooms for clothing and household linen, and two large play rooms for the pupils in inclement weather. The third story will be appropriated for the reservoirs for containing water, and will also afford space for lumber rooms; the height of the building will be about forty feet, and it will be located at a convenient and suitable distance west of the present out buildings. It is proposed that the water shall be raised from a well on the premises by a steam engine of about five horse power, and be forced to the

reservoirs by a pump, and from thence distributed to the out buildings and College at such height as may be needed for health and comfort.

The cost of the building when completed, is estimated at twelve thousand dollars. The cost of the well, engine, pump, and the fixtures, and the pipes connected with them, will be about fifteen hundred dollars. The cost of the reservoirs made of iron and of a cylindrical form to contain about 2,500 gallons each, will be about \$120 each. It is proposed to erect four of these at present and to add to the number as the family is enlarged. The cost of the pipes for distribution will be \$500. And for other apparatus and fixtures immediately required for washing, ironing and baking, about \$500. The whole sum needed will therefore be as nearly as we can estimate at \$1500. but a part of it, say one half, will not be required to be paid before April 1850. The directors have instructed me to ask that an appropriation be granted to the Commissioners of the Girard Estates for the purpose of enabling the board to make the contracts for the building and such parts of the work as are immediately required so that the same may be put into use before the ensuing winter. I have the honor to be, yours, &c.

JOS. R. CHANDLER,

*President of the Board of Directors
of the Girard College for Orphans.*

APPENDIX, No. LXXIII.

To the Select and Common Councils :

The Committee of Visitation of the Girard College, for the months of June and July, Report

That they have visited the College once in each month, inspected the several departments, and consider them to be conducted with proper regard to the directions of the founder, they have examined the account and minute books of the Directors, and the accuracy with which they are kept is highly creditable, but the amount of labor performed in this respect is not adequately compensated for to the Secretary. The committee noticed pools of water standing against the outside of the walls which enclose the grounds, and they would recommend that early attention be paid to them, by grading in such a manner that no water will lay within six feet of it. They also noticed that the large amount of earth on the outside of the wall

is pressing it over, as the inner side in some parts is twenty feet lower, they would recommend that good abutments be placed on the inside with as little delay as possible. The stone is also falling out of the piers, which should be attended to early, as the frost will affect it in the state it now is. Among the objects of interest presented to the notice of your committee, were the books, pictures, silver ware, china, clothing, and other personal property of Mr. Girard, and they were peculiarly attractive. In relation to these articles, it is respectfully suggested, that they ought to be catalogued, arranged, and carefully preserved in an apartment especially appropriated for that purpose, because in the course of time, when the living recollection of the great benefactor shall have passed away, the minutest of these relics will be eagerly sought after, and their examination furnish to the inquirer the most pleasing and appropriate illustrations of the character and personal habits of the venerated Stephen Girard.

An Ordinance

Making a further appropriation to the Committee on Public Highways for the purpose of repairing the pebble pavement of Delaware Avenue.

SECT. 1. *Be it ordained and enacted by the Citizens of Philadelphia in Select and Common Councils assembled,* That the sum of three thousand dollars out of the income of the fund appropriated under the twenty-second item of the Will of Stephen Girard, for the improvement of the eastern front of the city and Delaware Avenue, be appropriated to the Committee on Public Highways, for the purpose of repairing the pebble pavement of Delaware Avenue: said appropriation to be paid in the manner that appropriations for Delaware Avenue are directed to be paid in the several Ordinances relating thereto.

Passed August 16, 1849.

APPENDIX, No. LXXV.

The following resolutions are most respectfully submitted to the Members of the Common Council of the City of Philadelphia,

By their obedient servant,

JOHN YARROW,
Chairman of Committee.

Phila., August 29th, 1849.

OFFICE PENNA. RAIL ROAD CO.

Phila., August 25th, 1849.

At a meeting of the Board of Directors held on 22d inst. the following communication was submitted:

PHILADA. AUGUST 25th, 1849.

To the Directors of the
Pennsylvania Rail Road Co.

GENTLEMEN:—Circumstances connected with my private affairs, compel me to announce to you my intention of resigning the office with which you have entrusted me. I need

scarcely say that I take the step with great reluctance. Identified as I am in feeling and interest with the great work which, above all others, is destined to add to the prosperity of Philadelphia, I had hoped to have been prominently instrumental in urging it to final completion; and although I relinquish the position I have occupied as President of the Company, my exertions will not be wanting in forwarding its interests.

It is no small cause of regret that my official connection is severed with gentlemen both of the Board and in the Office, with whom I have acted in the most uninterrupted harmony and good feeling. A continuance of which it will always be my pleasure to cultivate.

Desirous of resuming my private business at as early a date as possible, and at the same time give a full opportunity to select a successor, I leave to the Board to fix the date at which my resignation shall take effect.

Very respectfully,

S. V. MERRICK,
Pres. Penna. R. R. Co.

The following resolution was then adopted :

Resolved, That a committee of four be appointed to take into consideration the communication of the President in reference to his resignation, and to nominate a suitable person to fill his situation as President, and report the same to the Board.

At a meeting of the Board held this date the Committee made a report and submitted the following resolutions, which were adopted :

Resolved, That the resignation of Samuel V. Merrick as President of the Company, be accepted, to take effect on the 1st September, in compliance with his wishes that an early day might be named.

Resolved, That the Board do now proceed to elect a President for this Company, to take effect on the 1st September, to fill the vacancy which will at this time be occasioned by the resignation of the President, S. V. Merrick, Esq.

The Board then proceeded to an election, after which the Chairman announced that Wm. Patterson, Esq., having received the whole number of votes polled, was declared unanimously elected President, to take effect on the 1st September.

The following resolutions were then submitted and unanimously adopted :

Resolved, That this Board has learned with great regret, that circumstances connected with his private affairs have induced Mr. Merrick to resign the position which he has occupied with so much ability, as President of the Pennsylvania Rail Road Company, since its organization.

Resolved, That the thanks of this Board are eminently due to Samuel V. Merrick, Esq., for the industry and intelligence which he has devoted to the welfare of our great work.

Resolved, That the Board trust it will be compatible with Mr. Merrick's other engagements to continue his connection with the Company in the capacity of a Director, sharing with his colleagues in their labour and responsibilities, and affording them the aid of his judgment and experience.

Extracts from Minutes.

THOMAS J. FIRTH,
Secretary.

APPENDIX, No. LXXVI.

To the Select and Common Councils :

The Committee on Police, having for some time past been engaged in investigating the causes of complaints of nuisances, arising from the stand for Omnibuses on Dock street, north and east of the Merchants' Exchange,

Respectfully report:—

That it is apparent this site, as designated by the City Commissioners, has become, as regards space, inadequate to the accommodation of the greatly increased number of coaches now employed. It is also sufficiently obvious, that the time has arrived requiring the interposition of Councils, in order to check the nuisances constantly occurring, and mainly, from the above cause recited. Your Committee therefore, submit herewith, for the consideration of Councils, a draft of an ordinance which they believe, if sanctioned by Councils, will, first, prevent many of the disgraceful scenes exhibited by the quarrels and personal collisions of the drivers, their agents, or other persons connected with their coaches; secondly, abolish the rude and officious conduct of these men plying for fares, towards citizens, especially women and children, while approaching or passing the vicinity; and lastly, promote the convenience

and interests of all parties—more particularly those of the public, for whose comfort these vehicles have ostensibly been introduced.

An Ordinance

Appropriating certain parts of Dock, Walnut and Third streets for stands for Omnibuses, and for enforcing useful regulations thereat, and for other purposes.

SECT. 1. *Be it ordained and enacted by the Citizens of Philadelphia, in Select and Common Councils assembled,* That the west side of Dock street, east and north of the Merchants' Exchange building, from Walnut street to Third street; the east side of Third street from Dock to Walnut street, and the north side of Walnut street, from Third to Dock street, excluding six feet on each side of any flag-stone crossings on said streets, shall be stands for omnibuses.

SECT. 2. *Be it further ordained and enacted by the authority aforesaid,* That if any omnibus be kept standing in any other part of the said streets than that appropriated for them as stands, the owner, driver or person having charge thereof, shall forfeit and pay the sum of five dollars for each and every such offence.

SECT. 3. *Be it further ordained and enacted by the authority aforesaid,* That if any agent or person employed to solicit fare or passengers for any omnibus or line of omnibuses occupying or using the stands hereby created, shall, while so soliciting fare or passengers, be further distant from the door of the omnibus for which he so solicits fare or passengers than fifteen feet, he shall forfeit and pay the sum of five dollars for each and every such offence.

SECT. 4. *Be it further ordained and enacted by the authority aforesaid,* That the penalties herein imposed shall be sued for and recovered with costs in the same manner that penalties for breach of ordinances are by law recoverable.

SECT. 5. *Be it further ordained and enacted by the authority aforesaid,* That whenever the City Commissioners shall by authority of existing ordinances appropriate any part of the public streets as a stand for omnibuses, they shall exclude from such stand the space of six feet on each side of any flag-stone crossing on such street.

SECT. 6. *Be it further ordained and enacted by the authority aforesaid,* That so much of any ordinance or regulation as is inconsistent herewith, be and the same is hereby repealed.

APPENDIX, No. LXXXIII.

To the Select and Common Councils:

The Committee on Legacies and Trusts in pursuance of the Ordinance of Oct. 1st, 1845, requiring the several Standing Committees to report from time to time to Councils their proceedings, respectfully

REPORT,

That as the duties of the committee for the year now terminate, it is proper they should render an account of the Legacies and Trusts under their management. They are as follows :

THE FRANKLIN FUND.

The Dr. Benjamin Franklin Legacy of \$4444 44 to be loaned at 5 per cent. per annum to married artificers under the age of 25, who have served an apprenticeship in the City of Philadelphia, consisted, at the last report of the committee, of bonds then considered good, - - - \$2419 83

Of which has since been paid, - - - 301 29

Bonds now considered bad, - - - 13962 44

Investments.

City 5 per cent. loan at par, - - - \$10200 00

" 6 " " " " - - - 1600 00

" 6 " " invested this year, 500 00

Bonds now considered good, - - - 2029 20

Cash—balance in Bank, - - - 542 10

THE SCOTT FUND.

The John Scott Legacy of \$3000, to be applied to the same purposes as that of Dr. Franklin, consisted, at last report of the committee,

Of Bonds then considered good, - - - \$938 29

Of which has since been paid, - - - 151 29

Bonds now considered bad, - - - 1460 05

Present Position of the Fund.

City 5 per cent. Loan, - - - - \$3200 00

" 6 per cent. " - - - - 800 00

Cash—balance in Bank, - - - - 228 28

Bonds now considered good, - - - - 1553 10

There have been several applications during the past year

for loans from these funds, but the necessary conditions were only reached in one case, on which \$260 00 was loaned from the Scott Fund.

FUEL FUND.

This fund arises from a donation by the Trustees of the First Lodge of Free Masons; a donation of Wm. Ricketts, Manager of the Circus; Fines and Fees received from the Mayor's Court, from Oct. 1796 to 1809; and from the bequests of John Bleakley, Elizabeth Kirkpatrick and Stephen Girard. The sum received from these sources now consists of—

City 5 per cent. Loan,	-	-	-	-	\$6800 00
4 shares stock in Bank of Penn.	-	-	-	-	1000 00
Cash—balance in Bank,	-	-	-	-	263 45

With the income from these funds the committee purchased 148 cords of oak wood, which was distributed to the poor according to the directions of the several donors.

Your committee have carefully examined the terms of the donations and bequests, and find in each case the word "Fuel" used; and with the design of effecting the greatest amount of good with the means at command, as coal is now so generally in use, and in the present condition of domestic economy of much greater comparative value than wood, it is believed that the efficiency of the Fund will be increased by distributing coal to such beneficiaries as can make a more economical disposition of it than of wood. In accordance with these views your committee have determined for the ensuing year to invest one-half in coal and one half in wood.

WILLS' HOSPITAL FUND

Consists of—

City 5 per cent. Loan,	-	-	-	-	\$14100 00
" 6 " " "	-	-	-	-	4800 00
Mortgage Philadelphia Exchange Co.,	-	-	-	-	50000 00
Cash—balance in Bank,	-	-	-	-	2875 24

YELLOW FEVER FUND,

Arising out of a bequest by John Bleakley, the annual income of which, under an act of the Legislature passed April 16th, 1838, was authorized to be used and applied in the same manner as the funds devoted to Wills' Hospital, consists of—

City 5 per cent. Loan,	-	-	-	-	\$11800 00
Cash—balance in Bank,	-	-	-	-	554 60

During the past year the committee have had under consideration the propriety of selling such parts of the Wills' Hospital lot as do not appear to be required for the actual uses of the institution. Several offers were received showing considerable enhancement in the value of the property; but the committee, after maturely considering the subject, were of opinion that in a short time a much greater advance in the value would probably take place, and determined that any action at the present time would be injudicious.

JOHN SCOTT'S PREMIUM FUND.

This fund, the income of which is to be laid out in premiums to be distributed among ingenious men and women who make useful inventions, consists of:

City 5 per cent. Loan,	-	-	-	-	\$7500 00
“ 6 “ Invested this year,	-	-	-	-	100 00
“ 6 “ “	-	-	-	-	500 00
Cash—balance in Bank,	-	-	-	-	275 41

The business of fulfilling the purposes of this fund was by Ordinance of Councils Sept. 9th, 1841, vested in the “Franklin Institute of the State of Pennsylvania for the promotion of the Mechanic Arts.” The provisions of the ordinance expired in Sept. of that year, and has been renewed for seven years.

The Board of Managers of the Institute having certified to the following awards, they were paid by the committee during the year, viz.

To A. G. Heckrotte, of Cumberland, Maryland, for his improved coupling for Rail Road Cars.

To Lieut. H. S. Steelwagon, of the United States Navy, for his invention of the Gidney Coast survey apparatus.

To Sabin Cotton, of Philadelphia, for improvement in door and padlocks.

SAMUEL SCOTTIN'S LEGACY.

This Legacy for the purchase of bread for the poor of the City and Southwark, to be distributed annually on the 23d of February—the birth-day of Mr. Scottin—unless the same shall fall on Sunday, consists of

An irredeemable ground rent of \$12 per annum.

PAUL BECK, JR.'s LEGACY

For the use of Soup Societies of the City was beneficially distributed during the severe weather of last winter. It consists of

A ground rent of \$500 per annum.

THE BOUDINOT LANDS

Remain as heretofore, and this committee refer for particulars of this property to the report of a sub-committee that visited the lands in the summer of 1848.

Your committee believe that the foregoing embraces all that would be interesting to Councils. Full details in any or all of the premises, can be readily reached when required.

All of which is respectfully submitted.

APPENDIX, No. LXXXV.

To the Select and Common Councils :

The Sanitary Committee respectfully

REPORT

That their appointment commenced on the 27th of June last, and its term will expire on the last day of the present month. From the 1st of June until the 27th of that month the duties, afterwards devolved on this committee, were performed by the committee on cleansing, which was then composed, like this committee, of all the members of Councils.

In bringing their business to a close, it has been deemed proper to present to Councils a statement of the acts and expenditures of this committee, and of the committee on cleansing during the period last mentioned, as both a proper exhibition of the exertions of the members of Councils for the restoration of the public health during the past epidemic, and also as on account of the application of the moneys so liberally placed at the disposal of the Sanitary Committee.

The cleansing committee, or a delegation of it, met daily (Sundays included) at the City Hall from the 1st to the 26th of June; and the Sanitary Committee met daily (Sundays included,) from the 27th of June to the 16th of August, and weekly from the 16th of August to the 26th of Sept., making in all 82 meetings during the months of June, July, August and September. While there was reason for apprehending a grave visitation of the pestilence, the committee considered it no violation of the Lord's Day to meet on it, to provide for any necessary emergencies which might arise, transacting however on that day no business which did not appear at the time to be necessary for the safety of our fellow-citizens and our own families.

The duties performed by the committee were chiefly a rigid enforcement of cleanliness in the city, and the prompt removal of all nuisances prejudicial to health, which embraced drainage, paving, and the liberal use of deodorizing substances, such as lime, chloride of lime and copperas.

All other reasonable sanitary measures which were from time to time suggested, were also adopted without delay. Among which the committee would enumerate the erection of temporary places of refuge for those families residing in the city, whom the Board of Health judged it expedient to remove from unhealthy or filthy residences, and who were too indigent to provide for themselves new homes. The committee also caused the police station-houses to be kept open during the whole of the 24 hours of each day, not only as centres for the execution of some of their measures, but also as places to which our citizens might resort for advice, assistance, or redress in any cases of necessity. And although from the prompt action of the Board of Health in providing Cholera Hospitals in our city, the sanitary committee were not obliged to establish city hospitals, yet they were called upon by the Board of Health to furnish police officers to be stationed at their hospitals within our city. This was promptly done; and in pursuance of the Ordinance giving him that power, the Mayor, on the request of this committee, appointed extra local policemen for those places.

The action of the Sanitary Committee it is believed is fully known to Councils; but the committee would do great injustice to the members of Councils if it were not stated, that the principal services rendered to the community were so rendered by the individual members of Councils in the various districts, one of which was specifically assigned to each of them.

It will be seen from the annexed statement of the expenditures of the committee, and of the cleansing committee while acting as a sanitary committee, that the city has expended for sanitary purposes since the 1st of June last, only the sum of \$7336 22; from which, however, should be deducted the sum of \$1616 08, being the cost of certain items which remain the property of the city, and are of permanent value; making this deduction, the sum actually expended for sanitary purposes will appear to be only \$5720 14.

In conclusion, the committee offer to Councils their heartfelt congratulations upon the merciful exemption of this city and its inhabitants from any grave visitation of the pestilence, even now raging in various parts of the world, which under God, ought to be ascribed to the prompt removal of everything having a tendency to produce disease, and the natural healthiness of the city, with its great advantages in the points of

sewerage, superficial drainage, and of an abundant supply of wholesome water.

APPENDIX, No. LXXXII.

To the Select and Common Councils :

The Committee on Police, respectfully report :

That the case of Robert Ralston a night policeman, is one that recommends itself to the attention and relief of Councils.

It appears from the testimony adduced before your Committee, that Mr. Ralston while attending at a fire in Franklin place, on the 16th of August, 1848, was exposed to extraordinary fatigue, and afterwards compelled to the privation of usual rest, and of an opportunity to change his thoroughly wetted clothing during the remainder of the night. From these causes he contracted a disease—consumption ;—to which it does not appear he was pre-disposed ;—which for the past six months has daily diminished his power of maintaining a dependent family, and gradually wasting away his life.

Your Committee therefore recommend the adoption of the bill annexed.
